THE FIX

WHAT IF THE CHART WAS THE LEVEL?

(turns out the answer rules)

↑ live · chartrunner.xyz/play/

HOW IT WORKS

EVERY KEYPRESS IS A REAL TRADE.

↑↑

→ fly

SPACE

→ shoot · gun on ground · laser in flight

PRESS 2

→ place tools · HLine, VWAP, Fib

PRESS 3

→ place primitives · Bracket, OCO, Ladder

DOUBLE-↓

→ drop into the upside-down

DIE / SAVE

→ mint a RunRecord PDA on Solana devnet

↑ in-game Campaign mode

PROOF

ON-CHAIN, NOW.

WHO'S BUILDING THIS

ONE GUY. PLUS CLAUDE.

Two Anchor programs. React wallet bridge.
33k-line game prototype. SDK extraction.
Custom domain. CI/CD. All shipped.

WHAT'S NEXT.

LIVE TRADING

Phoenix Rise · Flight builder · real perp fills · we earn fee_bps

PRIMITIVES ON CHAIN

anchor programs for match · arena · oracle · treasury

TRADING COMPETITIONS

tournaments · entry-fee escrow · on-chain leaderboards

MARKETPLACE UI

registry deployed · browser + buy flow · v0.9.8

MOBILE

desktop only today · touch + responsive next

REALTIME MULTIPLAYER

async leaderboard works · live PvP arena follows

MAINNET

after the marketplace + match programs land

WHY THIS WINS

ONLY SOLANA RUNS THIS. ONLY THIS SHIP IS BUILDING IT.

- Solana fees + latency = game-loop synchronous tx
- chart-as-world is genuinely novel (verify: search)
- candle-source-agnostic SDK = drop on any DEX
- retro pixel aesthetic ≠ another corp dashboard
- on-chain marketplace primitive already deployed
